VI MSc SS – Package Evaluation

Name	:	Jenisa Merlin D
Roll No	:	21PW08
Package Title	:	Hotel Management App
ABSTRACT : The Hotel Management System is a user-friendly platform built with PHP, JavaScript, Bootstrap, and CSS. It comprises an admin section and a user section. In the admin section, administrators can effortlessly manage bookings, track profits, handle payments, maintain room inventory and send newsletters. The system offers a straightforward dashboard for easy navigation and efficient management. For users, the system provides a seamless experience for browsing through pages like the homepage, about, services, rooms, and Contact Us. They can easily book rooms according to their preferences. Overall, the Hotel Management System simplifies hotel operations, enhances the booking process, and ensures a convenient experience for both administrators and users.		
Tools	:	Visual Studio Code (VSCode), XAMPP server, phpMyAdmin
Technologies	:	HTML, CSS, JavaScript, Bootstrap, PHP
